Introduction

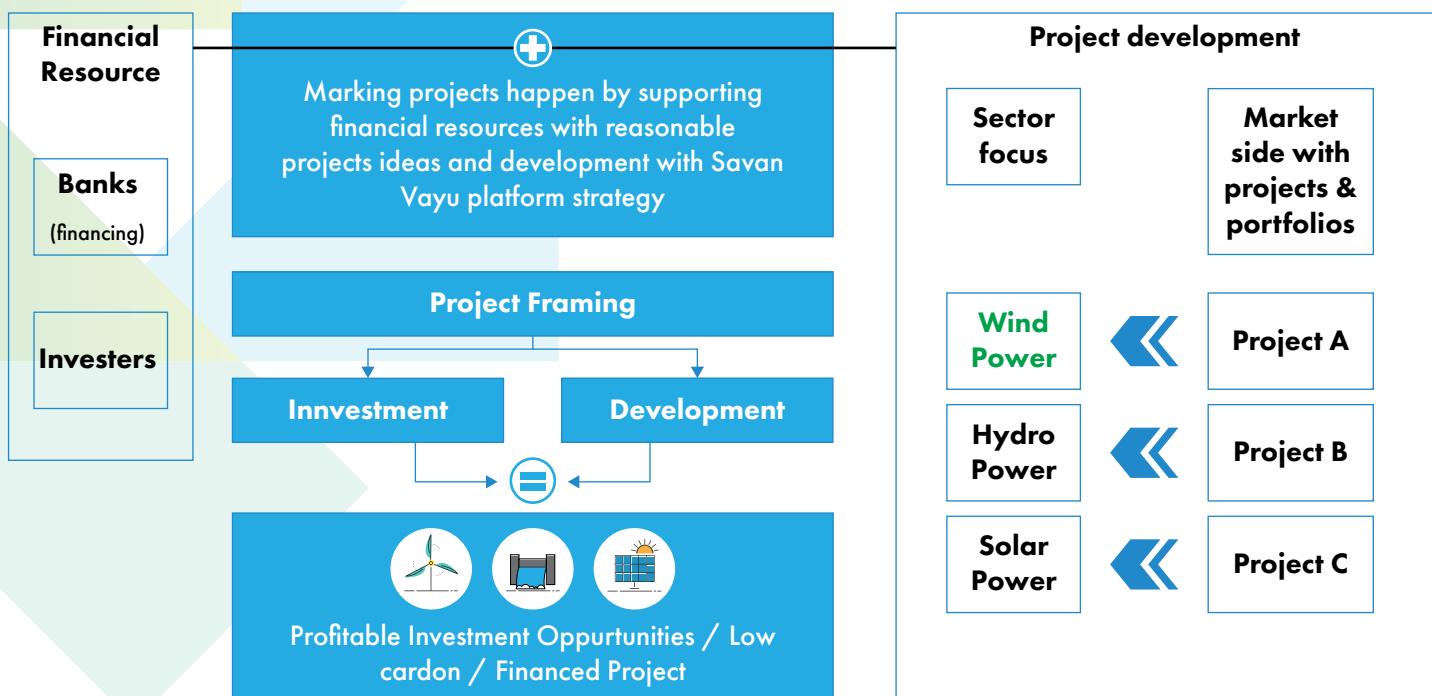

Savan Vayu Renewable energy Co., Ltd¹⁾ established by cooperation between leading Lao and Vietnam companies that has a portfolio of total Gigawatts capacity renewable energy projects throughout Lao PDR and Vietnam for more than 10 years. The team has wide ranging experience in all aspects of the feasibility study, environmental impact assessment, planning, design, special logistics and transportation and construction, operation and maintenance of wind farms and other energy related projects.

The company mission is generating recurring revenue by partnering, developing and adding value by land sustainable solutions to develop, own and operate low carbon infrastructure to support the zero-carbon transition. This includes onshore wind farms and solar plants, hydropower plants, electricity transmission and distribution grids alongside providing energy products and services for better life of local community, businesses as well as sustainable economic-social development of Lao PDR

Business Area and Approach

Renewable Energy Development & Investment:

- Identification of possible specific zone for renewable energy development.
- Establishment of project company for identified project.
- Development of project until ready-to-build stage.
- Construction until COD and O&M.
- Power generation and distribution, Operation & Maintenance.

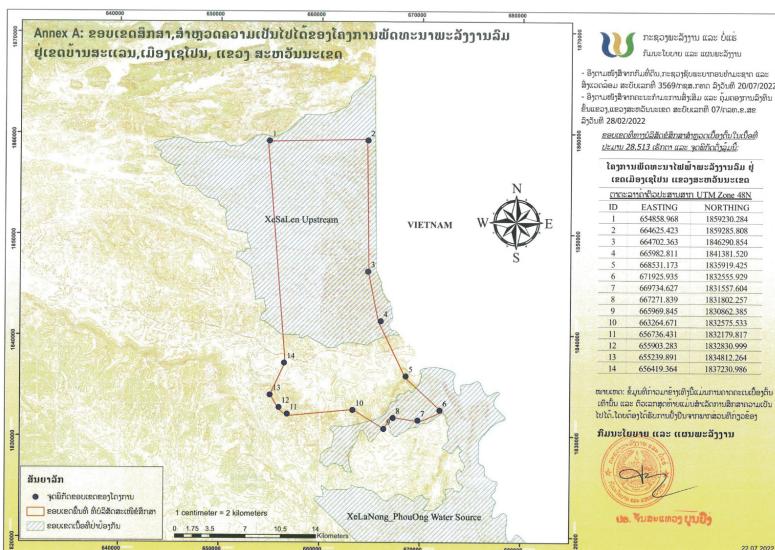

Project Development

“Savan Vayu Wind Power Farm”

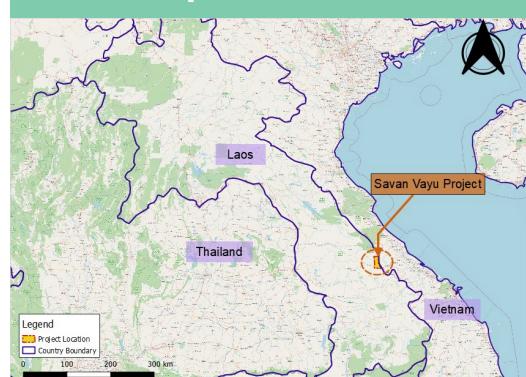

Project	Wind Power in Lako Focus Area, Sepon District, Savannakhet province
Location	Lako Focus Area, Sepon District, Savannakhet province, Lao P.D.R.
Land Area	28,513 ha (For Feasibility Study)
Installed Capacity	1,200 MW (approx.. 200+ towers of 5-6 MW Wind turbines)
Implement Schudule	2023-2027 (Phase I [2023-2025], II [2024-2026], III [2025-2027] and IV [2026-2027])
Client	EVN-Vietnam (under MOU of Lao-vietnam Goverment)

Project Study Area and potential wind resource map

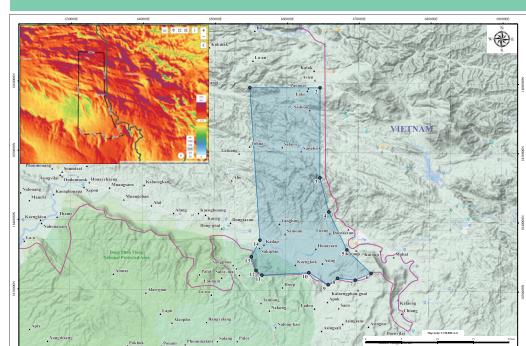

(issue by Ministry of Energy and Mine)

Project Location

Wind speed 8-10m/s

Project Implementation schedule
